

```
1 //49. Create a program using break to read inputs
   from the user in a loop and break the loop if a
   specific keyword
2 //(like "exit") is entered.
3 import java.util.Scanner;
4
5 public class BreakOnExit {
6     public static void main(String[] args) {
7         Scanner sc = new Scanner(System.in);
8         String input;
9
10        while (true) {
11            System.out.print("Enter something (type '
exit' to quit): ");
12            input = sc.nextLine();
13
14            if (input.equalsIgnoreCase("exit")) break
;
15
16            System.out.println("You entered: " +
input);
17        }
18
19        System.out.println("Exited the loop.");
20    }
21 }
22
```
