```java
1  //19. Create a program that shows bitwise XOR of two
   numbers.
2  import java.util.Scanner;
3
4  public class BitwiseXorCalculator {
5      public static void main(String[] args) {
6          Scanner scanner = new Scanner(System.in);
7
8          System.out.print("Enter first number: ");
9          int num1 = scanner.nextInt();
10
11         System.out.print("Enter second number: ");
12         int num2 = scanner.nextInt();
13
14         int result = num1 ^ num2;
15
16         System.out.println("Bitwise XOR of " + num1
   + " and " + num2 + " is: " + result);
17
18         scanner.close();
19     }
20 }
21
22
```
